About ASSDA

The Australian Stainless Steel Development Association aims to increase the consumption of stainless steel in Australia.

ASSDA provides cohesive industry representation and support to all those involved in the design, specification, manufacture and use of stainless steel.

ASSDA produces a range of technical and promotional publications written by the stainless steel industry for the stainless steel industry.

ASSDA

Stainless Steel fabrication to avoid corrosion

Understanding corrosion and how to control it is a critical part of good stainless steel fabrication. In theory the specification should provide the rules for a satisfactory construction but often adequate fabrication details are missing. This interactive workshop will provide the tools and knowledge for fabricators to avoid corrosion pitfalls and improve the quality of the outcome for their customers.

ASSDA has designed this workshop to examine corrosion resistance and corrosion mechanisms that can most frequently affect stainless steel. It is a practical workshop with real examples and hands on demonstrations. The workshop will have immediate and direct benefit to fabricators who attend, assisting them to avoid the most common corrosion failures.

What Does This Workshop Cover?

The workshop will cover the following topics:

- What corrosion is
- How stainless steel resists corrosion
- Common stainless steel corrosion mechanisms
- Fabrication practices that help prevent corrosion

Who Should Attend?

This Seminar is for anyone involved in the following areas:

- > Fabricators of stainless steel
- > Accredited Fabricators of stainless steel
- > Fabricators wanting to participate in stainless steel fabrication
- > Production line manufacturers, designers, engineers and suppliers who want to understand the practical issues around corrosion and assist their customers to achieve better outcomes

Important

Cancellations within 7 working days of the workshop will be charged at full price. Replacement delegates may be sent however, in lieu of cancellation. The organisers reserve the right to cancel workshops due to insufficient registrations or other reasons beyond their control.

The Speakers

Graham Sussex

Graham Sussex has over 30 years experience as a materials scientist in both England and Australia and has developed particular expertise in stainless steel. Graham has worked on corrosion research and problem solving since 1979. He has authored more than 550 technical reports and papers and has examined virtually every aspect of stainless steel performance in Australian Industry.

He is the Director of Sussex Materials Solutions and has been answering technical inquiries on ASSDA's behalf since August 2001.

Richard Matheson is the Executive Director of the Australian Stainless Steel Development Association. He is an expert in plain language communication and possesses an intimate knowledge of the stainless industry.

What will you get?

The workshop includes the following;

- Reference Manual
- Practical knowledge with immediate application to improve your business
- Workshop notes and presentations
- complementary publications

Accredited Fabricators

ASSDA Accredited Fabricators are invited to register three delegates at the price of two.

Date and Venue Details

BRISBANE Michael's Oriental Restaurant & Function Centre 223 Padstow Road (Cnr Warrigal Road) Eight Mile Plains	11 June 2008
SYDNEY Harold Park Pavey Corner Ross and Wigram Streets Glebe, NSW	12 June 2008
MELBOURNE Jika International Hotel 551 Heidelberg Road Fairfield, Melbourne	13 June 2008
PERTH Currie Hall Cnr Winthrop Ave and Mounts Bay Rd Crawley (free parking available) (opp main entrance to University of WA)	17 June 2008
ADELAIDE Enterprise House 136 Greenhill Road Unley, Adelaide	18 June 2008
Time:	8:30am - 1:00pm (8:15am registration)
Cost:	ASSDA members \$110 including GST Non members \$165 including GST

Light refreshments included
